

# TECHNICAL GUIDANCE

INDICATION, TOTALIZATION, 2-POINT ALARM,  
DC4 to 20mA AND PULSE OUTPUT BY ONE UNIT

## TF-2000T Series

ALL-IN-ONE MINI THERMAL MASS FLOWMETER

### OUTLINE

TF-2000T MINI THERMAL MASS FLOWMETER is for the measurement of mass flow rate of various gases without being influenced by changes in pressure and temperature. TF-2000T has LCD indication of flow rate and totalization. Also, functions of scaled output pulse and DC4 to 20 mA are provided. In addition, two point field adjustable alarm contacts are provided. TF-2000T can be operated by DC24V power supply. As mentioned above, one unit provides all necessary functions for flow measurement. Full function and wide Line-up of TF-2000T cover various applications.

### FEATURES

- Wide range of process connection  
Rc 1/4" screw to 3" flanges are available. They are useful with the extensive use in general process, air conditioning and gas supply line etc.
- Simultaneous indication of flow rate and totalization  
Large size, two line LCD is provided!
- Output of current, Pulse and Alarm functions are provided.  
Remote indication, batch processing and safety operations are achieved by one unit.
- Up to six kinds of gas and scale range can be chosen  
Up to 6 different gases and scale ranges can be preset using keys.
- Mass flow measurement  
Flow measurement is not influence of the change in pressure and temperature.

### STANDARD SPECIFICATION

Fluid	Gas (Gas containing more than 10% of hydrogen or helium, or mixed gas of hydrogen or helium with CnHm is unsuitable.)
Scale range	Min. 0 to 2L/min (nor) Max. 0 to 750m <sup>3</sup> /h (nor)
Rangeability	1 : 20 (std.)
Gas press.	- 0.07 to 1.0MPa (std.)
Gas temp.	0 to 60°C
Temp. change effect	Within ±0.1% F.S./°C
Press. change effect	Within ±0.1% F.S./0.1MPa
Response	1 sec. for 90%
Material	Tube : SUS316 [Excluding TF-2251T] SUS304 or SUS316 [TF-2251T] (SUS304 only as for the flange connection) Sensor : Combination of SUS316, Glass, CTFE and PT Seal : FKM or CR Housing : AC2A
Finish	Housing : Munsell N8.5 Stainless body not painted
Construction	Waterproof (Equiv. to IP65)
Installation	Horizontal or Vertical (*)
Ambient temp.	0 to 60°C
Cable entry	2 x G1/2 (terminal: M3 screw)
Power supply	DC24V (DC22V to 27V)
Consumption	Approx. 5.5W

Installation & flow directions: Horizontal and Left to Right (standard) set up at factory.

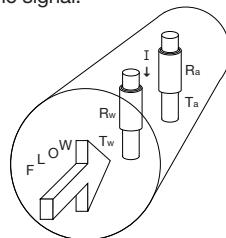

- Excellent in durability  
Excellent durable sensor supported by old know-how is used.
- Low pressure drop  
Low pressure drop type is about 2kPa at max. flow
- High speed response  
90% response within a second and also corresponding to batch processing and total flow rate control
- Stabilization of Flow rate display and current output  
By setting up a filter coefficient, flow display and current output can be stabilized.
- Loop check function  
Operation of equipment can be checked in the condition without flowing gas.

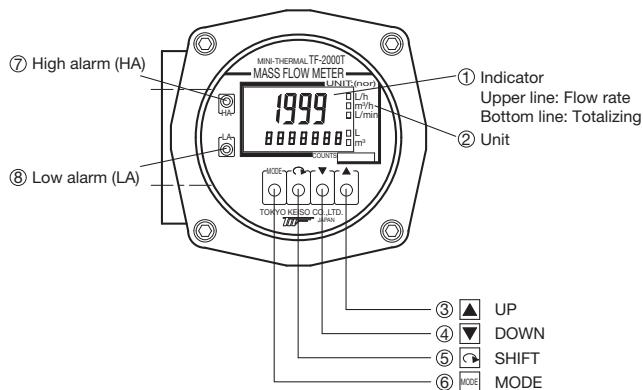

### OPERATION PRINCIPLE

Temperature detection sensor Ra and velocity detection sensor Rw are installed in the gas flow path of TF-2000T MINI THERMAL MASS FLOWMETER. The internal electronic circuits keep the temperature gap between Rw (Tw) and Ra (Ta=Gas temp.) constant by supplying electric current I. The transferred heat from Ra to passed gas ( $RwI^2$ ) is proportional to the mass flow rate of the gas to be measured which can be calculated from supplied current I. The detection of mass is not influenced by the change in gas pressure and temperature because it is compensated by the internal software, and finally the measurement is made, completely independent of any operating conditions.

The flow rate is calculated from the supplied current I and outputted in the form of electric signal.

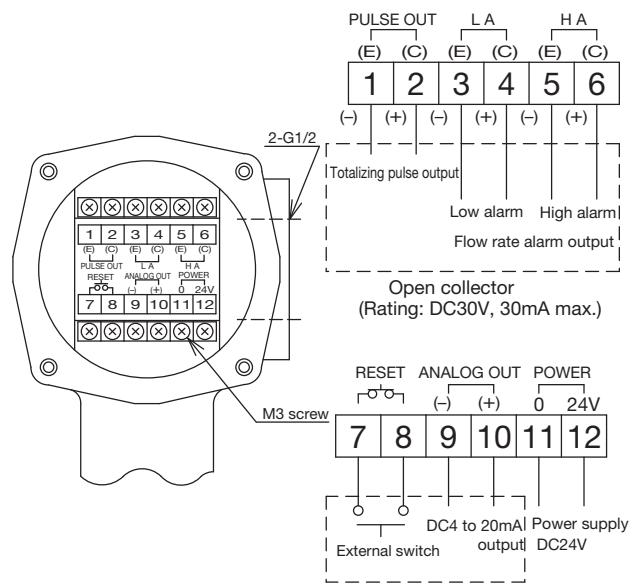

## FRONT PANEL AND FUNCTION

\* Use the MODE key for gas setting.

## TERMINAL

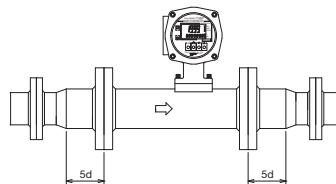

Indication	Flow rate : 4 digits    LCD Height: 13mm Totalization: 7 digits    LCD Height: 6mm
Accuracy	Flow rate : $\pm 2\%$ F.S. $\pm 1$ dig. Totalization : $\pm 2.1\%$ F.S. Totalizing count : 60 to 18000c/h
Low cut off	Std. 5%F.S. (Depending on rangeability) Flow rate, Totalization, Current output, Pulse output
Output	<p>Current output            Output : DC4 to 20mA (Load resistance 500ohms or less)            Max. output value: (Approx.) 24.0mA            Accuracy : <math>\pm 2\%</math>F.S.</p> <p>Pulse output            Output : Open collector            Rating : DC30V, 30mA Max.            Pulse width : (Approx.) 100ms fixed            Pulse rate : Synchronized with pulse count</p> <p>Flow rate alarm output            Output : Open collector            Action : "ON" when operating            (with Red LED for operating confirmation)            Rating : DC30V, 30mA Max.            Setting : Push key at front panel            No. of points : 2 points (H + L alarm)            Setting accuracy: <math>\pm 1.0\%</math>F.S.            Setting range : 0 to 100% of F.S.            Hysteresis : <math>1 \pm 0.5\%</math>F.S. fixed</p>
Data backup	Setting of parameter and totalizing value is memorized by EEPROM. (Retaining: For 10 years)

## **CAUTION FOR INSTALLATION**

- Straight run for upstream and downstream (d: diameter)

Model code	Upstream	Downstream	Model code	Upstream	Downstream
TF-2211T			TF-2421T		
TF-2221T			TF-2431T	5d (*3)	Unnecessary (*3)
TF-2231T	Unnecessary		TF-2441T		
TF-2241T					
TF-2251T	5d (*1, 2)	5d (*1, 2)			

\*1 The tolerance of the pipe with the different connection from flowmeter is  $\pm 1$  size. Install the necessary straight run with the same connection as flowmeter.

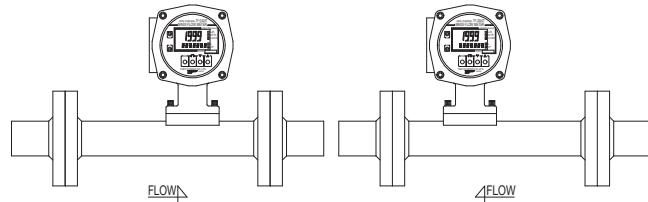

\*2 Use the pipe less than Sch. 80 for Rc screw connection.

\*3 Installation of the pipe is the same connection of flowmeter.

- ❑ Before installing the flowmeter onto process piping, flush and clean the whole piping.
  - ❑ Install valves downstream if any.
  - ❑ Use the shielded cable for wiring and do not locate it near to power supply line etc. to avoid the electric noise.
  - ❑ There is the arrow mark showing the flow direction. Make the installation so that the measured gas can flow as per the arrow marking.

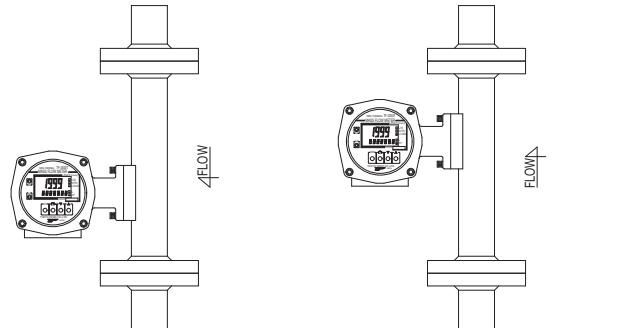

## INSTALLATION POSTURE

#### ● Horizontal installation

Flow direction: Left to Right      Flow direction: Right to Left

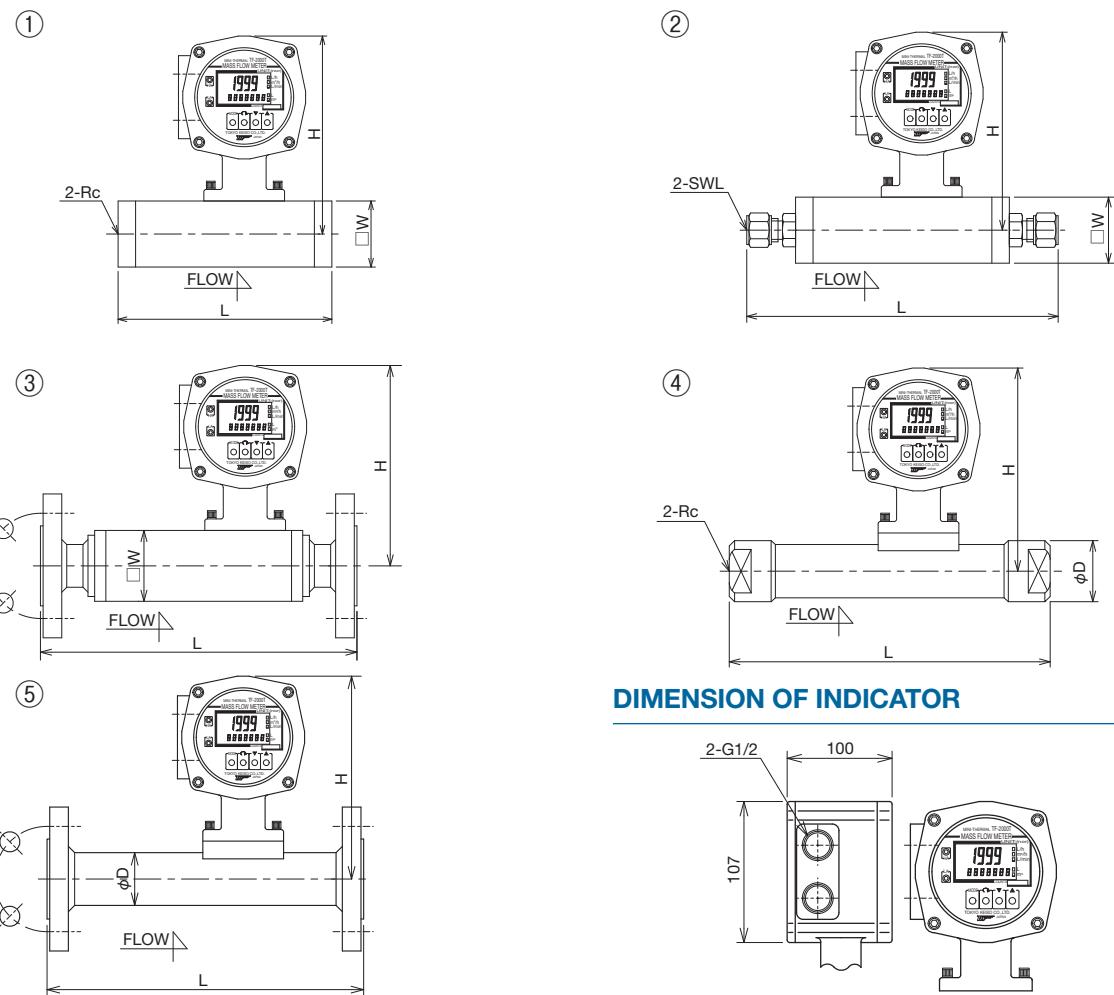

#### ● Vertical installation

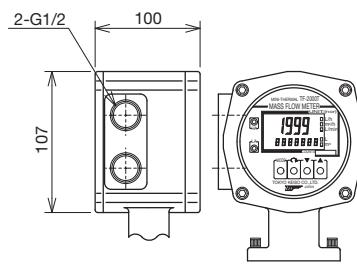

Flow direction: Top to Bottom      Flow direction: Bottom to Top

- \* When installing vertically, indicator can be placed on the right-hand side. Specify to that effect when ordering. At this time, cable entry is on the upper side, so waterproof treatment shall be performed.
